

## OVERVIEW

DONOCLE is a global lottery project using more than 50 types of Coins and Tokens as goods. Fairness is maximized by disclosing transparently the Blockchain-based raffle method and prize money.

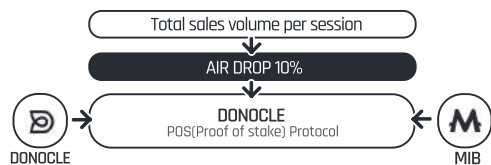

### Focus

- Business Sales
- Contribution of Altcoin distribution
- Exchange Volume
- Global Rules

The success of ICO depends on the profit rate of its project. The close of ICO must be turned into profit creation, and that profit should constantly support the development of its project to create stable exchange volume and price.

DONOCLE lottery focuses on the distribution and circulation of Coin, and the Top 50 coins and tokens are used to purchase the lottery and the total purchased volume will be used for distribution.

The 50 or so types of coins circulating in the market can be used for DONOCLE. During the process that these coins are converted into cash, there is no intervention whatsoever. Concerns by specific countries or specific cryptocurrency exchanges over disruption in the market for cryptocurrencies have been taken into account, so that the DONOCLE POS(Proof-of-Stake) system has a feature where a portion of the profits is secured through a proof of stake protocol.

## CORE TEAM

### • Jaden Park, Co-CEO, Co-Founder

CEO of Blockchains and virtual currency exchanges Developments of MIB. Major network servicer experts in online and mobile gaming field for 20 years. Mobile game consultant in Excite Portal in Japan. FPS Game Dispath of Army Reached 10 Million Users in Asia. Infograms Worms World party, operation flash point battle net.

### • Jake Jin, Co-Founder Chief Strategy Officer

- MetalGene Limited. ( CEO )
- PlayPort Inc. ( Vice President & COO )
- Pacific One Inc. ( CSO )
- M Dream co.,Ltd. ( CSO )
- Haofriend Limited ( CEO )
- Soribada Co., Ltd. ( CSO )
- DiGiCube Co.,Ltd. ( CEO )
- BA University of Queensland / Australia

### • David Han, Co-Founder

Chief Executive of the Leadnext Chief Executive of the META CNS - Sports TOTO. LOTTO Solution develop leading company CEO - BND (KOSDAQ) Chief Executive of the INFINITUS (KR.VN) CEO - EBSI (KOSDAQ) CMO - BET (KOSDAQ) - Brazil LOTTO, VLT Economics Bachelor's, ISU

### • Seunggoo Cho, CTO, Chief Technology Officer

Seunggoo majored Information & Communication, and he worked as Server Developer in Netmarble. Seunggoo has experience as Server Developer in various Online and Mobile games, and he has developed DataBase Design, Tuning, Communication Module, Mass Traffic Processing and other various Network Server Developments. He is now in charge of the Blockchain Team and leads Core Module Designing and Implementation for the Team.

## GOALS & HIGHLIGHTS

### • DONOCLE Lottery Service

#### A. Raffleing method for the lottery

- Lottery ticket are purchased using the 50 types of coins or tokens currently circulating in the market.
- The six digits from the BTC nonce is used as the raffle number.
- The total coins paid out for the purchase of lottery tickets

The nonce value of BTC(Bitcoin) at the time of the raffle is used as the raffle number.

#### B. Price of lottery tickets

Price is determined through the same process as when the BTC market price is determined on a cryptocurrency exchange. 1 Ticket is pegged at 0.0001BTC and the corresponding alt coins have their price set by the reference price on highly reliable exchanges. In the case there is a price difference of 5% or more, the price from the exchange in question is excluded.

### • DONOCLE POS System

Donocle has a unique profit allocation system.

This is the core of Donocle services and contributes to the beneficial function of the coins, which is their distribution and usage. It offers convenience to users and also an opportunity to create profit. Moving away from a profit structure based on transactions, users can generate a more stable profit.

For POS(Proof-of-stake) Donocle or MIB COIN can be used.

The POS system automatically starts your AIRDROP 15 days after your first deposit.

DONOCLE is a token but its new concept brought AIRDROP through POS styled Proof-of-Stake

## MILESTONES

### 2018 Q1

- Donocle Whitepaper development
- Donocle project designing and technical aspect research
- MIB Blockchain Platform linkage re-search (SBP : SmartX Blockchain Platform)

### 2018 Q2

- Donocle PTE.LTD Singapore Donocle establishment
- DGBLS™ (Donocle Global Blockchain Lottery System)
- Donocle Official website
- DGBLS™ designing

### 2018 Q3

- Donocle project enhancement
- PreSale start
- IDCM Listing contract

### 2018 Q4

- Hong Kong branch establishment (Donocle International)
- Donocle Project Demo
- Lottery License acquisition (2 overseas region)

### 2019 Q1

- Exchange trade start (Hong Kong, Korea)
- Global marketing
- Trial service toward global users
- in March POS system test in March Main Service launch in April

### 2019 Q2

- DONOCLE business expansion
- Propelling DONOCLE Donation Foundation establishment

## SCREENSHOT

Name	DONOCLE
Total Supply	600,000,000
Coin Accepted	BTC, ETH, EOS
Soft Cap	2,000 BTC
Hard Cap	5,000 BTC

## STRATEGIC PARTNERS
